Summary

Gate (DA) qualified and AWS Certified AI Practitioner with deep expertise in mathematical modelling , Large Language Model optimization , agentic workflows , and generative AI architectures . Successfully mentored 500+ learners in Higher Mathematics , python and AI fundamentals . Adept at designing multi-agent systems , constructing data-driven pipelines , and applying cutting-edge machine learning and deep learning to real-world high-complexity domains .

Education

2025	CSE(AIML)	B.Tech	Techno Main Salt Lake	8.1/10
2019	XII	Higher Sec. School	Sunshine School	93%
2017	X	Sec. School	Sunshine School	89%

Industry Experience

2025 Jun - 2025 Dec	AI Trainee-Consultant	Kaara Info Systems
2024 Jan - 2024 Feb	AI Intern	Nexus Info
2023 Nov - 2024 Jan	Computer Vision Intern	Arkham Archives Pvt Ltd.

Technical Skills

Programming & Libraries	Python,MySQL,Pytorch,Tensorflow,OpenCV,Flask,FastAPI,Django , Docker, Ultralytics,Transformers, MediaPipe.Azure,HTML,CSS .
Generative AI	BERT,LangChain,LangGraph,CrewAI,LLM,RAG,Vector DB,LoRA,QLoRA,MCP.

Projects

- Vehicle Damage Detection and Claims Mangement System .** *Kaara Info Systems(2025)*

 - Developed end-to-end projects involving vehicles image data collection , annotation , data preparation, model development , a Chatbot for helping the customer know the model analysis and the Claim summary .
 - FineTuned and the Train the existing Pretrained Vehicle classification model and Trained with thousands of damage sample images for the project and implemented the detection system using YOLO model and real time location tracking to compare from the claimed information with deployment of the project on azure .
- Agentic AI based Healthcare Insurance Claims Management System** *Kaara Info Systems(2025)*

 - Designed a Full FastAPI based Claim management system with OCR driven document extraction , verification , adjudicator and TPA workflow, Azure OpenAI RAG chatbot for multiparty communication .
 - Built a LangGraph multi-agent fraud detection engine integrated with real-time PM-JAY data and automated invoice generation , timely email support for each step to keep patient informed and deployment on Azure .
- AI-Based Automatic Freight Quotation Generation from RFQ** *Kaara Info Systems(2025)*

 - Devoloped an automated freight quotation engine that extracts shipment details from emails and generates accurate , real-time cost estimates using database lookups and LLM-assisted validation .
 - Integrated a surcharge & rule-engine applying BAF , CAF , THC and other dynamic charges and built end to end workflows for auto-quotation generation , PDF export and email delivery-significantly reducing manual effort .
- Document Intelligence System** *Kaara Info Systems(2025)*

 - Built an AI-driven Document Intelligence System using Azure GPT-4o Vision, OpenCV and LLMs to extract data , auto-fill multi-document PDF form templates with precise field mapping and 95% accuracy .
 - Designed an end to end workflow supporting document verification, multilingual support and real time validation .
- Chatbot Using Agentic RAG and VectorDB** *Nexus Info(2024)*

 - Built an end-to-end RAG-based domain chatbot using Langchain , Langgraph , Vector Databases , FastAPI and HuggingFace Large Language Models with semantic retrieval , LLM response generation .
 - Implemented data visualization like charts , histograms for Visual data analytics when uploading CSV datasets.
- 3D Image Generation , Computer Vision** *Arkham Archives Pvt Ltd(2023)*

 - Engaged with team in developing 3D image generation using Computer Vision for Game Development .

Sports & Hobbies

- Awarded 2nd position two times in Yoga Competition and among top 10 players in Gymnastic Competition .
- I hold a Green Belt in Karate and with a Team of 2 , we won a badminton competition taking the 2nd position .
- My hobby is to play flute and Doing Mimicry as a Voice Artist .
